Volvik

THE #1 COLOR GOLF BALL ON TOUR

Volvik

VOLVIK DERIVATION

VOLans

VIctory

Korea

Volans is a French word, which represents Volvik golf ball's characteristics of powerful and accurate ball flight. The brand 'Volvik' symbolizes its confidence in leading the golf product market by becoming the world no. 1 golf brand.

THE #1 COLOR GOLF BALL ON TOUR

Volvik

In over 37 years of golf ball production, Volvik has developed a reputation based on perfect quality control and innovative development, quickly becoming one of the most significant and trusted golf ball manufacturers in the world.

Volvik is dedicated to the production of specialized 3 and 4 piece multi-layer golf balls that feature patented dimple technology for optimal performance that satisfies the needs of golfers of every skill level. Volvik is renowned for its world leading technology and innovation with over 58 International Patents. Volvik balls are strenuously tested to provide unmatched durability and have been designed to maximize energy transfer, resulting in greater distance.

4 MAIN PATENTS

1. World First Patented Dual Core

Straight Accuracy

Volvik's high resilient dual core optimized with its more solid inner core provides maximum transfer of power from the inner core for maximum distance. This world leading technology is the world's first patent and in the US, UK, Japan and Korea. The dual core optimizes distance by transferring the power from the solid inner core to the soft outer layer instead of transferring inertia from soft inner core to solid outer layer like the competitors. The outer layer also reduces excessive driver spin, increasing the moment of inertia and centrifugal force, leading to longer distance.

3. Bismuth Mixed Outer Core

Distance

The outer core of the golf ball that contributes a great source of power, Bismuth, is compressed in a high temperature heating treatment. Unlike normal metal, Bismuth expands 3-3.5% in volume, leading to greater energy transfer.

2. Zirconium Compound Cover

Spin Control Durability

Zirconium is the base material for ceramic and improves durability of a golf ball cover without sacrificing spin control. 'Volvik' combines zirconium metal in the outer cover to provide exceptional spin control and durability, while the patented elastic inner cover provides an excellent putting feel and optimal spin rates.

4. Various Dimple Patterns

Trajectory Patent

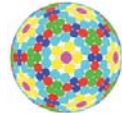

332 dimple
VIVID XT
Quasi Icosahedron

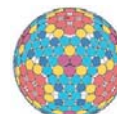

336 dimple
S3 / S4 / VIBE
Quasi Cube-octahedron

TEST RESULT

THE TEST RESULTS ARE IN!

VIVID VS. 5 Best Sellers

The VIVID by Volvik, the coolest ball with matte finish is the longest and best performance ball you've ever played!

In a recent independent Iron Byron test conducted by Golf Labs San Diego the VIVID won against best-selling golf balls for the distance categories : Titleist Pro V1, Callaway Chrome Soft, Wilson Staff Duo Urethane, Callaway Supersoft, Bridgestone E6

#1 Highest 8-Iron Spin VS 5 other of best-selling golf balls is US Marker tested against:

#1 in Carry Distance VS 5 other of best-selling golf balls is US Marker tested against:

VIBE VS. Competitor

VIBE by Volvik, New Leader in The Soft Urethane 3-piece Golf Ball Market.

In a recent independent Iron Byron test conducted by Golf Labs San Diego the VIBE won the following categories against the Callaway Chrome Soft:

#1 in Driver Carry Distance

– Beat the Chrome Soft by exactly 5 yards on best 5 hit average

#1 in 8-Iron Distance

– Beat the Chrome Soft in both Carry Distance and Total Distance with an 8-Iron

#1 in Low Driver Spin

– Beat the Chrome Soft in low driver spin by 343 RPMs (2897 RPM VIBE VS 3239 RPM Chrome Soft)

#1 in Low Dispersion Average with a Driver

– Beat the Chrome Soft in low driver spin by 343 RPMs (2897 RPM VIBE VS 3239 RPM Chrome Soft)

Independent test was conducted by GolfLabs San Diego June 28, 2016 with a 90 MPH Swing Speed with a 10.5 degree Driver with a stiff shaft and an Iron with a stiff shaft.

►► HYBRID

Best clubs for best juniors.

Volvik junior clubs offers high technology to junior golfers. The set is consist of driver, hybrid and iron. Perfect set for 8 to11 years old height approx. 117cm to 137cm.

[Benefits]

Aero dynamic driver and hybrid creates high ball flight and low-centred iron ensures hitting ball high trajectory. Putter with advanced technology helps putting the ball with accuracy.

Stand Bag

Stand prop and soft shoulder band offers comfort during round. Pockets for versatile purposes.

Junior Focused Design

The lengths, weights and lofts are designed specifically for juniors. The hosel offset helps square the face at impact for better distance and accuracy.

For More Distance

Metal woods are designed for maximum distance. The low center of gravity and perimeter weighting are strategically set to help easy ball flight.

For Perfect Play

Total set is designed for junior players' best performance.
